Sir,

I am in receipt of Eighteen (18) Bags of Silver Coin containing Two Thousand Three Hundred and Thirty three ($2,333) Dollars, sent from the U.S. Mint, St Louis, Mo. for redemption, and although that Officer has been advised by the Department that Coin must be counted when forwarded for this purpose, they are packed in such a manner as to require the whole force of the Redemption Department an entire day to unpack them for examination.

In addition to their being mixed, other than current pieces are thrown in to many among them rendering it almost impossible to count them correctly

Sir,

I enclose herewith a copy of circular of Office 12th 1871 of which we are very much in need. The circular of a later date March 24. 1874 refers to that of 1871. and without the first named the latter gives but little information to depositors. I will thank you to have 1000 of the first named printed for use here.

Depositors are sending coin unassorted, and too much time is consumed in preparing deposits for counting.

It would be well to supply the several Assistant Treasurers with the above named circular, as much of the trouble is caused by these Officers.

In reply to your letter of 18th inst in relation to 9 24 shot in your deposit of pine cones I have to say, that the count of said deposit was verified by a calculation made from the weight and the count as reported found to be correct. Permit me to call your attention to the discrepancy between the amount in Kind, as stated in your schedule and the report from the office

Schedule		Report from the office

If your schedule is incorrect, as it evidently was, as to amount and Kind may

It also will be meant as to the total unit?
